Kenneth Frampton

City Planning According to Artistic Principles Camillo Sitte, 1965

Camillo Sitte George R. Collins, Camillo Sitte, Christiane Crasemann Collins, 2006-01-01 This 1889 text by a noted Austrian architect and urban planner ignited a new age of city planning. Inspired by medieval and baroque designs, Sitte emphasized the creation of spacious plazas, enhanced by monuments and other aesthetic elements. Numerous illustrations, plus extensive commentary, notes, and bibliography.

The Art of Building Cities Camillo Sitte, 1979 This classic is organized as follows: I. The Relationship Between Buildings, Monuments, and Public Squares II. Open Centers of Public Places III. The Enclosed Character of the Public Square IV. The Form and Expanse of Public Squares V. The Irregularity of Ancient Public Squares VI. Groups of Public Squares VII. Arrangement of Public Squares in Northern Europe VIII. The Artless and Prosaic Character of Modern City Planning IX. Modern Systems X. Modern Limitations on Art in City Planning XI. Improved Modern Systems XII. Artistic Principles in City Planning— An Illustration XIII. Conclusion

The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

The Architecture of Community Leon Krier, 2009-05-08 Leon Krier is one of the best-known—and most

provocative—architects and urban theoreticians in the world. Until now, however, his ideas have circulated mostly among a professional audience of architects, city planners, and academics. In *The Architecture of Community*, Krier has reconsidered and expanded writing from his 1998 book *Architecture: Choice or Fate*. Here he refines and updates his thinking on the making of sustainable, humane, and attractive villages, towns, and cities. The book includes drawings, diagrams, and photographs of his built works, which have not been widely seen until now. With three new chapters, *The Architecture of Community* provides a contemporary road map for designing or completing today's fragmented communities. Illustrated throughout with Krier's original drawings, *The Architecture of Community* explains his theories on classical and vernacular urbanism and architecture, while providing practical design guidelines for creating livable towns. The book contains descriptions and images of the author's built and unbuilt projects, including the Krier House and Tower in Seaside, Florida, as well as the town of Poundbury in England. Commissioned by the Prince of Wales in 1988, Krier's design for Poundbury in Dorset has become a reference model for ecological planning and building that can meet contemporary needs.

Camillo Sitte and the Birth of Modern City Planning George Roseborough Collins, Christiane Crasemann Collins, 1963

The City Crown by Bruno Taut Matthew Mindrup, Ulrike Altenmüller-Lewis, 2016-03-09 This book is the first English translation of the German architect Bruno Taut's early twentieth-century anthology *Die Stadtkrone* (*The City Crown*). Written under the influence of World War I, Taut developed *The City Crown* to promote a utopian urban concept where people would live in a garden city of 'apolitical socialism' and peaceful collaboration around a single purpose-free crystalline structure. Taut's proposal sought to advance the garden city idea of Ebenezer Howard and rural aesthetic of Camillo Sitte's urban planning schemes by merging them with his own 'city crown' concept. The book also contains contributions by the Expressionist poet Paul Scheerbarth, the writer and politician Erich Baron and the architectural critic Adolf Behne. Although the original German text was republished in 2002, only the title essay of *The City Crown* has previously been translated into English. This English translation of Taut's full anthology, complete with all illustrations and supplementary texts, fills a significant gap in the literature on early modern architecture in Germany and the history of urban design. It includes a translators' preface, introduction and afterword to accompany the original composition of essays, poems, designs and images. These original texts are accompanied by illustrations of Taut's own designs for a utopian garden city of 300,000 inhabitants and over 40 additional historic and contemporary examples. The new preface to *The City Crown* explains the premise for the English translation of Taut's anthology, its organization and the approaches taken by the translators to maintain the four different voices included in the original work. Matthew Mindrup's introduction critically examines the professional and intellectual developments leading up to and supporting Bruno Taut's proposal to advance the English garden city concept with a centralized communal structure of glass, the city crown. Through the careful examination of original

Urban Design Reader Steve Tiesdell, Matthew Carmona, 2007-02-07 Essential reading for students and practitioners of urban design, this collection of essays introduces the 6 dimensions of urban design through a range of the most important classic and contemporary key texts. Urban design as a form of place making has become an increasingly significant area of academic endeavour, of public policy and professional practice. Compiled by the authors of the best selling *Public Places Urban Spaces*, this indispensable guide includes all the crucial definitions and various understandings of the subject, as well as a practical look at how to implement urban design that readers will need to refer to time and time again. Uniquely, the selections of essays that include the works of Gehl, Jacobs, and Cullen, are presented substantially in their original form, and the truly accessible dip-in-and-out format will enable readers to form a deeper, practical understanding of urban design.

Camillo Sitte George R. Collins, Rizzoli, Christiane Crasemann Collins, 1986

The Urban Design Reader Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of *The Urban Design Reader* draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design. Nearly 50 generous selections include seminal contributions from Howard, Le Corbusier, Lynch, and Jacobs to more recent writings by Waldheim, Koolhaas, and Sorkin. Following the widespread success of the first edition of *The Urban Design Reader*, this updated edition continues to provide the most important historical material of the urban design field, but also introduces new topics and selections that address the myriad challenges facing designers today. The six part structure of the second edition guides the reader through the history, theory and practice of urban design. The reader is initially introduced to those classic writings that provide the historical precedents for city-making into the twentieth century. Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid-1990s. These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places. The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places. These selections are largely describing the outcomes of mid-century urban design and voicing concerns over the placeless quality of contemporary urbanism. The fourth part of the Reader explores key issues in urban design and development. Ideas about sprawl, density, community health, public space and everyday life are the primary focus here. Several new selections in this part of the book also highlight important international development trends in the Middle East and China. Part Five presents environmental challenges faced by the built environment professions today, including recent material on landscape urbanism, sustainability, and urban resiliency. The final part examines professional practice and current debates in the field: where urban designers work, what they do, their roles, their fields of knowledge and their educational development. The section concludes with several position pieces and debates on the future of urban design practice. This book provides an essential resource for students and practitioners of urban design, drawing together important but widely dispersed writings. Part and section

introductions are provided to assist readers in understanding the context of the material, summary messages, impacts of the writing, and how they fit into the larger picture of the urban design field.

Megaform as Urban Landscape Kenneth Frampton, 1999

Visual Planning and the Picturesque Nikolaus Pevsner, 2010 A previously unpublished work by Nikolaus Pevsner, much of which was published as journal articles in the *Architectural Review* in the 1940s and 1950s during Pevsner's term as editor.

Cities and Cultural Landscapes Greg Bailey, Francesco Defilippis, Azra Korjenic, Amir Čaušević, 2020-03-05 Places are locations of value where psychological and cultural needs are satisfied. Human relationships with particular environments play a key role in motivating, developing, and nurturing the life of societies. Undifferentiated space becomes 'place' as we understand it better and its built and natural forms become endowed with value. However, misunderstanding the critical importance of heritage locations, particularly based on rejection of local and regional distinctiveness, has often led to their destruction. Featuring essays from across central Europe and beyond, and aimed at practitioners, decision makers and concerned citizens alike, this book raises awareness about the responsibility that we bear for every action taken that modifies the formal and socio-cultural context. Potentially, these actions can negatively impact the cultural landscape. Learning to recognize the essential value of heritage to the 'place-ness' of our cities and landscapes is vital in helping us to preserve and enjoy their intrinsic beauty and cultural importance.

Public and Private Spaces of the City Ali Madanipour, 2003-09-02 The relationship between public and private spheres is one of the key concerns of the modern society. This book investigates this relationship, especially as manifested in the urban space with its social and psychological significance. Through theoretical and historical examination, it explores how and why the space of human societies is subdivided into public and private sections. It starts with the private, interior space of the mind and moves step by step, through the body, home, neighborhood and the city, outwards to the most public, impersonal spaces, exploring the nature of each realm and their complex, interdependent relationships. A stimulating and thought provoking book for any architect, architectural historian, urban planner or designer.

Architecture and the Urban Environment Derek Thomas, 2007-06-01 This well illustrated text forms a critical appraisal of the place and direction of architecture and urban design in a new world order at the start of the 21st century. The book defines architectural and environmental goals for the New Age by analysing recent contemporary work for its responsiveness to important social and environmental issues and comparing it to successful precedents in architecture. It argues that this new sustainable approach to architecture should be recognised as a new development of mainstream architectural history. This practical guide illustrates current social and natural resource issues to aid architects in their approach to future design. Environmental economics is presented as a potential bridge over the divide between the expectations of the business sector and the concerns of environmental lobbies. Through examples and case studies, an

accessible analysis of carefully researched data, drawn from primary sources over four continents, allows the author to outline the current urgency for architects and urban designers to respond with real commitment to current and future changing contexts. This book expresses a holistic vision and proposes a value system in response to the diagnosis. It includes: sound architectural and environmental ethics; end user involvement in the design process and technological advances aimed at sustainable resource use. Includes international case studies from Europe, North America, the Developing world including South Africa, South America and Central Asia.

Urban Ethic Eamonn Canniffe, 2006 Looks at the development of urban design, focusing on four elements: the physical dimension of monuments and spaces, and the humanist dimension of patterns and narrative in cities.

The Architecture of the City Aldo Rossi, 1984-09-13 Aldo Rossi was a practicing architect and leader of the Italian architectural movement La Tendenza and one of the most influential theorists of the twentieth century. The Architecture of the City is his major work of architectural and urban theory. In part a protest against functionalism and the Modern Movement, in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study, and in part an analysis of the rules and forms of the city's construction, the book has become immensely popular among architects and design students.
